PRIORITY DOCUMENT

SUBMITTED OR TRANSMITTED IN
 COMPLIANCE WITH RULE 17.1(a) OR (b)

I, the undersigned, being an officer duly authorised in accordance with Section 74(1) and (4) of the Deregulation & Contracting Out Act 1994, to sign and issue certificates on behalf of the Comptroller-General, hereby certify that annexed hereto is a true copy of the documents as originally filed in connection with the patent application identified therein.

REC'D 30 JUL 2004

In accordance with the Patents (Companies Re-registration) Rules 1982, ~~WIRQ Company AG~~ in this certificate and any accompanying documents has re-registered under the Companies Act 1980 with the same name as that with which it was registered immediately before re-registration save for the substitution as, or inclusion as, the last part of the name of the words "public limited company" or their equivalents in Welsh, references to the name of the company in this certificate and any accompanying documents shall be treated as references to the name with which it is so re-registered.

In accordance with the rules, the words "public limited company" may be replaced by p.l.c., plc, P.L.C. or PLC.

Re-registration under the Companies Act does not constitute a new legal entity but merely subjects the company to certain additional company law rules.

Warning

After an application for a patent has been filed, the Comptroller of the Patent Office will consider whether publication or communication of the invention should be prohibited or restricted under Section 22 of the Patents Act 1977. You will be informed if it is necessary to prohibit or restrict your invention in this way. Furthermore, if you live in the United Kingdom, Section 23 of the Patents Act 1977 stops you from applying for a patent abroad without first getting written permission from the Patent Office unless an application has been filed at least 6 weeks beforehand in the United Kingdom for a patent for the same invention and either no direction prohibiting publication or communication has been given, or any such direction has been revoked.

Notes

- If you need help to fill in this form or you have any questions, please contact the Patent Office on 08459 500505.
- Write your answers in capital letters using black ink or you may type them.
- If there is not enough space for all the relevant details on any part of this form, please continue on a separate sheet of paper and write "see continuation sheet" in the relevant part(s). Any continuation sheet should be attached to this form.
- If you have answered 'Yes' Patents Form 7/77 will need to be filed.
- Once you have filled in the form you must remember to sign and date it.
- For details of the fee and ways to pay please contact the Patent Office.

RE-FILLABLE POCKETS

This invention relates to re-fillable self-adhesive transparent pockets.

Sticky notes provide a well-known method to store and display *temporary* information. Although very useful, they are often scribbled on and stuck haphazardly around (for example) PC monitors or on telephones (handsets and on the body of the telephone itself) – especially in the office. The note itself is often shaped such that it needs to be trimmed or folded to fit neatly around a monitor or phone, and the stickiness often fails after a while, if the note is kept for any period of time (eg to hold a telephone number for a current client).

According to the present invention there is provided a re-fillable self-adhesive pocket. These are:

Transparent Pocket Strips (plain, coloured or patterned) with a Self-Adhesive Peel off Sticky Back. They hold Write-able Refill Strips (either transparent or opaque, coloured, clear, plain or patterned) which slide in and out of the pockets, in order to display semi-permanent or permanent information that needs to be readily available.

As stated, this invention allows the user to store *semi-permanent* information in a convenient, tidy and aesthetically pleasing form. The pockets will be useful for situations where information needs to be readily available, it needs to be around longer than a sticky note does well, but it doesn't need to be permanent.

A specific embodiment of the invention will now be described by way of example with reference to the accompanying drawing in which:-

Figure 1 shows the pockets individually and in blocks of 10, and also in different lengths. It also illustrates how write-able refills would slide into and out of the pockets.

Figure 2 illustrates how the pockets may be used on a PC monitor.

Figure 3 illustrates how the pockets may be used on a telephone.

Referring to the drawing the pockets could be used with PC monitors and telephones in order to display 'semi-permanent' information such as telephone numbers, passwords etc. There is currently no means of doing this in a funky but pragmatic way that is long lasting, but not permanent.

Write on the refill cards, and slip them into the pockets. The pockets will fix, for example, on the sides and tops of monitor faces (the plastic frame around the screen) and on telephone receivers or face (as well as anywhere else that they might be useful).

The pockets will be transparent but can be of many colours and designs and textures. The refills also be of many colours and designs and textures but easy to write on. The pockets and refills can be of any size and shape.

The basic pockets could be sold in strips of ten and separated by the user individually or into blocks of sizes of their own choosing. The designs can range from basic for the mass office users, to urban funky for cooler users, to cutesy for children, glittery and starry for girls, etc. etc.

CLAIMS

- 1 A re-fillable self-adhesive transparent pocket consisting of transparent casing in the form of a pocket of any shape or size, with a self-adhesive back for sticking onto surfaces. The pocket will allow write-able refills to slide in and out of the pocket.
- 2 A re-fillable self-adhesive transparent pocket claimed in any preceding claim wherein transparent casing means any material that allows the contents of the pocket to be seen, but may be coloured or patterned as well as clear.
- 3 A re-fillable self-adhesive transparent pocket claimed in any preceding claim wherein the self-adhesive back means a self-adhesive back of any form that allows the pocket to stick to surfaces.
- 4 A re-fillable self-adhesive transparent pocket claimed in any preceding claim wherein the write-able refills means write-able refills of any material which allows them to be written on by pen or pencil.
- 5 A re-fillable self-adhesive transparent pocket claimed in Claim 4 wherein the write-able refills means write-able refills that fit into the pockets and slide in and out of them.

ABSTRACT

RE-FILLABLE POCKETS

A re-fillable self-adhesive transparent pocket, which may be plain, coloured or patterned. The pockets have self-adhesive peel off sticky backs, which allow them to be stuck onto any number of surfaces e.g. the casing around a PC monitor. The refills are write-able and may be either transparent, opaque, coloured, clear or patterned and slide into and out of the pockets. The pocket has the purpose of allowing the user to store *semi-permanent* information and display it in a convenient, tidy and aesthetically pleasing form.
